

ARIANNA MULTIPURPOSE

Black hose made by PVC-P, reinforced with a Polyester yarn. Special PVC-NBR liner, which enhances a high flexibility even at low temperatures. Completely smooth inside and outside.

Light and flexible, this versatile hose is suitable for applications where a good chemical resistance, to mineral oils, lubricants, ageing and weathering, is required.

In industry, it is used for the pressure delivery of commonly used solutions such as water, compressed air, oils, lubricants and chemicals. In agriculture, it is used for pressure spraying of fungicide solutions, fertilisers, herbicides on atomisers.
