BAND CLAMPS

GALVANISED & STAINLESS STEEL BAND CLAMPS

Band Clamps provide a versatile and cost-effective clamping solution for a wide range of installations. Manufactured from either galvanised mild steel or stainless steel strip, each clamp features a wide band and bolt adjustment for a secure, adjustable fit.

Select the required material and tube size, and state the outside diameter (OD) you are clamping onto when ordering.

PRODUCT DETAILS

Galvanised & Stainless Steel Band Clamps – Product Details

Band Clamps offer a simple, versatile and cost-effective solution for a wide range of clamping installations.

Each clamp is constructed from galvanised mild steel or stainless steel strip, which is formed into shape and fitted with a bolt. The wide band provides an adjustable clamping range, allowing the clamp to be tightened to the required fit using the bolt at the top.

Key Features

- Available in galvanised mild steel or stainless steel
- Wide band construction
- Bolt-adjusted clamping range
- Versatile clamping solution
- Cost-effective design
- Available to suit a range of tube sizes

When ordering, select the required material and tube size and provide the outside diameter (OD) that the clamp will be fitted around.

FAQS

Frequently Asked Questions About Band Clamps

What are Band Clamps used for?

Band Clamps provide a versatile and cost-effective clamping solution suitable for a wide range of installations.

What are the Band Clamps made from?

The clamps are manufactured from either galvanised mild steel or stainless steel strip.

Are stainless steel Band Clamps available?

Yes. The Band Clamps are available in a choice of galvanised mild steel or stainless steel.

How are the Band Clamps tightened?

Each clamp has a wide band with an adjustable clamping range. The clamp is adjusted and tightened using the bolt positioned at the top.

How do I choose the correct Band Clamp?

Select the required clamp material and the appropriate tube size from the available product options. You should also provide the outside diameter (OD) of the item you are clamping onto.

Do I need to provide the outside diameter when ordering?

Yes. When ordering, you are asked to state the outside diameter (OD) that the Band Clamp will be fitted around.
