

VULCANO PVC

Black PVC-P hose, reinforced with a steel spiral. Slightly corrugated inside and outside. This material is flame retardant, according to UL 94 V0.

Due to its high mechanical properties, it can be used in many applications, especially when good dynamic properties are required: flexible, light, easy to handle, really good bending. Good resistance to most chemicals, ozone, UV rays, weathering and ageing. Constant wall thickness 0,6 mm.

The hose can be conductive ($R < 10^2$ Ohm/m) by grounding the spiral.

This product is recommended for use in Industrial ventilation and air conditioning systems, fumes and dust extraction, suction of vapours and gases.

Vulcano PVC is available only with a 51mm diameter and in 12m lengths.

Further discounts are available for bulk buys, while stocks last. Contact us for more information.
